PROJECTS

📚 SnapKors – University Exam & Notes Platform
Tech Stack: React, Flutter, Node.js, Express, PostgreSql, REST API, Firebase

Description:

SnapKors is a mobile-first platform designed to help university students access, purchase, and manage exam papers and academic notes. It includes an admin dashboard built with Flutter and a backend developed in Node.js.

🛒 TinaMart Business PLC – E-commerce Platform
Tech Stack: React.js (Admin Dashboard), Laravel (API), RESTful Services, Antd, Axios

Description:

Developed an admin dashboard for TinaMart's e-commerce platform to manage products, users, orders, and inventory. The frontend was built in React.js and integrated seamlessly with a Laravel-powered backend API.

🌍 BK Tour Booking System
Tech Stack: React.js (Customer Website & Admin Dashboard), Node.js, Express, MongoDB, JWT Auth, REST API

Description:

A complete tour booking platform designed for travel agencies and customers. The system includes a customer-facing website for browsing and booking tours, and an admin dashboard for managing bookings, tours, and payments.
